

One-row potato planter

One-row potato planter mounted on the three point suspension system of tractor. The planter is mounted on the tractor with three point suspension system, **CAT 1N**. During single cycle all the activities concerning with potato planting are performed (it makes furrows, automatically seeds the potatoes and ridges the seeded plants with soil). The potatoes can be planted at variable distance seed in a row (**29 cm, 32 cm and 35 cm**) in the **metal wheels** and a constant distance of **32 cm** in the **rubber wheels**. Changing the distance of seed potatoes in a row of **29 cm by 32 cm to 35 cm** can be achieved by changing the diameter of the wheels. Planting depth is **10 - 15 cm**.

Technical specification

Symbol	-	S239/2
Spacing between bodies	mm	625 / 725
Tank capacity	kg	90
Weight	kg	130
Power	kW/HP	15/20
