

Two-row potato planters

Potato planter is two-row planter mounted on the three point suspension system of tractor. The planter is mounted on the tractor with three point suspension system, **CAT 2**. During single cycle all the activities concerning with potato planting are performed (it makes furrows, automatically seeds the potatoes and ridges the seeded plants with soil).

Potatoes can be planted in the interrows **62.5 / 67.5 cm or 70/75 cm** at variable distances seed in a row (**29 cm, 32 cm and 35 cm**) in the **metal wheels** and a constant distance of **32 cm** in the **rubber wheels**. Changing the distance of seed potatoes in a row of **29 cm by 32 cm to 35 cm** can be achieved by changing the diameter of the wheels. Planting depth is **10 - 15 cm**.

Technical specification

Symbol	-	S239	S239/1
Row width	mm	625 - 675	700 - 750
Tank capacity	kg	180	300
Weight	kg	210	220
Power	kW/HP	28/38	32/43
